

STRUCTURAL SOUNDNESS CERTIFICATE

Date: 04.08.2026

Certificate No.: 01

This is to certify that I have inspected the building along with Mandal Engineering Officer, Arakuvalley situated at Arakuvalley, constructed the building in the year 1998.

The inspection included a visual assessment of the structural components such as the foundation (wherever accessible), columns, beams, slabs, load-bearing walls, roof, staircase, and other structural members. The condition of the building was assessed for visible signs of distress, including cracks, deflection, settlement, corrosion of reinforcement, deterioration of concrete, and any other structural defects.

Based on the inspection and the available information regarding the building, it is my professional opinion that the building is structurally sound and stable for its intended use, subject to routine maintenance and provided that no unauthorized structural alterations or additional loads are imposed without proper structural design and approval.

This certificate is issued based on the condition of the building observed on the date of inspection and is valid for 5 years from the date of issue, subject to periodic maintenance and there being no major structural changes or damage caused by natural calamities or other unforeseen events.

Building Details:
